It's my pleasure to share with you a technique that may help a lot with improving Russian vocabulary and its circulating in your long-term memory. This method is all about using English phrases which pronunciation has another meaning in Russian. Very interesting, right? Imagine a person pronounces something meaningful in English that makes sense in Russian too, but just has another meaning. Moreover, this phrase sounds the same or very close to English original one. It looks like a speech encryption, when there is a hidden meaning behind ordinary words. Our brain adores things like that, and keeps it in memory for a long time. You can only regret that you have not used this technique before. Because it works, it really works! Quick learning method is used, based on opening hidden brains skills and capability of our memory to quickly hook and when it's necessary to instantly recall information prepared by special way. No cheating, no kidding, and no magic. Just approved scientific approach using effective mnemonics. What is a mnemonic? Actually, this is a kind of a memory aid that very helps to memorize a phrase via relatable associations. Tested in practice countless times. I invite you to increase your level of Russian

tremendously – you can catch a useful phrase spending just a couple of minutes. Here is how to memorize easily Russian version of English phrase “Hello” as formal, polite and universal kind of greetings, well known as “Zdravstvuite”. Learned phrases from this and future booklets will be with you forever or at least for decades. Whether you like it or not. Your memory will say, “Thank you, master!” while you will just enjoy the effect of appearing phrases learned by the method. That’s truth. Even if you are the whole zero in Russian. No grammar, no boring rules, just rapid improving your vocabulary in Russian. I say you one more thing – grammar doesn't make sense without vocabulary. Of course, grammar is pretty important, but just imagine which way is it more convenient to talk with a native Russian – having good knowledge of grammar with lack of words or having good vocabulary with poor grammar? When I had faced this memory improving technique for the first time around a year ago, you know, I was shocked and felt so regretful letting all these years of learning English as foreign language pass by. All these years of studying English were difficult, at least not easy, but could be much easier if somebody said me about this method. I just cannot believe I made an incredible effort and wasted endless hours while I could spend my time more effective. Why this nice way has never been mentioned in schools, at universities? Anyway, even now this approach based on mnemonics and relatable associations is not common in use as a school, or college, or university learning method. So you decide whether you are going to repeat my mistake or not.

Let me drop a couple of words about myself. I'm a native Russian tutor with PhD degree who is a writer and a scientist at the same time. My teaching experience is more than 15 years. Well, look, maybe my English is not as good as yours, but my Russian is just excellent, and I'd like to share with you the best of my experience.

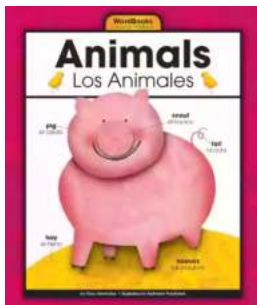

This booklet is the fourth brochure of the whole series of ones I have prepared for you and running to publish soon. The number “four” means that you have already

learned three phrases. And not just have learned, but fixed it in your memory forever. These results are confirmed by numerous scientific studies conducted in different countries of the world. I love each of these phrases and ways to remember them, I hope, as much as you do. There are many interesting and useful phrases ahead of you, which I am sure you will also quickly learn and, most importantly, remember for a long time. Enjoy reading, learning and memorizing a phrase presented. Do not hesitate to ask anything finding me on facebook by name (Albert Zaynullin),location (Ufa, Russia) and picture.
