For over four decades, Henry has traveled to the most remote corners of the globe, venturing into dense jungles, scaling towering mountains, and even exploring mysterious caves. Armed with his passion for insects and an unwavering dedication to their preservation, he has discovered numerous species previously unknown to science.

Into the Insect Kingdom

Imagine walking through a lush jungle, the cacophony of exotic bird calls filling the air. Suddenly, you spot a flash of vibrant colors darting between leaves – it's a butterfly! But not just any butterfly. It's the rare Blue Morpho, with its iridescent blue wings, fluttering gracefully before your eyes. This is just a small glimpse into the mesmerizing world that Big Bug Henry Cole has unraveled.

Henry's unwavering curiosity and passion for insects have taken him on countless adventures. From studying tiny fire ants to capturing awe-inspiring photographs of beautifully camouflaged stick insects, his love for these creatures knows no bounds.

The Importance of Insect Conservation

Not only does Big Bug Henry Cole study insects for his own personal fascination, but he also understands the vital role they play in our environment. Insects are

inextricably linked to the health of ecosystems, pollinating plants, breaking down dead matter, and being a crucial part of the food chain.

Unfortunately, many species are facing imminent threats due to habitat destruction, climate change, and the use of harmful pesticides. Big Bug Henry Cole has dedicated his life to raising awareness about insect conservation and advocating for their protection. Through his research and public speaking engagements, he strives to instill a sense of wonder and importance for these incredible creatures.

Some Fascinating Insect Discoveries

Over his illustrious career, Big Bug Henry Cole has made some remarkable insect discoveries that have captivated the world:

- **The Jewel Hornet:** Henry stumbled upon this magnificent hornet species with its dazzling, gem-like colors in the dense rainforests of Southeast Asia.
- **The Neon Beetle:** While exploring the remote Amazon rainforest, Henry stumbled upon this luminescent beetle that emitted a soft neon glow in the dark.
- **The Orchid Mantis:** Hidden amongst the colorful flowers of the Indonesian islands, this mantis species perfectly mimics the appearance of an orchid, making it a master of camouflage.

Size is relative, but everything is worth seeing in this concept book from the illustrator of And Tango Makes Three—now available as a Classic Board Book.

Beginning with a beautiful close-up of a “big” ladybug, this adorable board book artfully depicts the concept of scale as it zooms out from the bug, to a flower, to a cow, all the way to an expansive spread of sky. Then author Henry Cole masterfully zooms back in from that sky, to a tree, to a house, to a window, all the way to the end where an adorable dog is taking a “little” nap.

Young readers will love the lush illustrations of the animals, objects, and scenery of a farm, and they’ll delight in seeing how something “big” can suddenly seem “little” with every turn of a page!
