

# Create Beautiful Mobile Apps With Javascript And React Native

Mobile application development has undergone significant advancements in recent years. With the emergence of frameworks like React Native, developers now have the power to create beautiful mobile apps using JavaScript.

React Native is a popular framework developed by Facebook that allows developers to build mobile applications using only JavaScript. It provides a native experience with the performance and look-and-feel of a native app, while allowing the development process to be faster and more efficient due to the use of JavaScript.

One of the biggest advantages of React Native is its ability to write a single codebase that can be shared across different platforms, including iOS and Android. This significantly reduces development time and costs, as there is no need to build separate applications for each platform.

## Fullstack React Native: Create beautiful mobile apps with JavaScript and React Native

★★★★☆ 4.3 out of 5

Language : English

File size : 56534 KB

Text-to-Speech : Enabled

Screen Reader : Supported

Enhanced typesetting : Enabled

Print length : 690 pages

Lending : Enabled

Another benefit of using React Native is the vast array of third-party libraries and components available. These libraries can be easily integrated into your app, saving you time and effort. Whether you need to incorporate navigation, maps, or authentication, there is likely a pre-built solution available for you to use.

Furthermore, React Native's hot-reloading feature allows developers to see changes in real-time, making the development process faster and more efficient. With a simple refresh, you can instantly see the updates you have made, without the need to rebuild the entire application.

When it comes to creating beautiful mobile apps, React Native offers a multitude of styling options. With the help of CSS-like stylesheets, you can easily define the look and feel of your app. You have the flexibility to create custom styles, animations, and transitions, giving your app a unique touch and ensuring it stands out in the crowded app market.

Another advantage of using React Native is its strong developer community. With a large and active community, you can find support and resources easily, making the learning curve less steep. Whether it's community forums, tutorials, or open-source projects, there is no shortage of information available to help you succeed.

JavaScript, being the most popular programming language for web development, also plays a crucial role in creating mobile apps with React Native. With JavaScript knowledge, you can leverage your existing skills to develop mobile apps, without the need to learn an entirely new programming language.

Moreover, React Native allows for easy integration with existing native code, making it possible to add platform-specific features whenever required. This flexibility allows developers to make the best use of both React Native and native code, resulting in feature-rich and visually stunning mobile applications.

, with the power of JavaScript and React Native, developers now have the ability to create beautiful mobile apps with ease. The ability to write a single codebase that can be shared across different platforms, the wide range of third-party libraries available, and the flexibility to style and customize your app make React Native a powerful choice for mobile app development.

So, if you're looking to build stunning and performant mobile apps, consider leveraging the power of JavaScript and React Native to unlock your app's full potential.

# Master React Native with Fullstack React Native

The up-to-date, in-depth, complete guide to React Native.

Create beautiful mobile apps with JavaScript and React

Deliver high quality mobile apps, at light speed.

Building the same app in both Swift and Java is time-consuming. With React Native, you can release a native app on both iOS and Android from a single codebase.

Do you or your team already know JavaScript?

Leverage your existing knowledge to build world class mobile applications.

The React Native ecosystem is evolving fast. Get started on the right foot.

With such an active community and so many updates, it feels impossible to know what's best and what's just noise. We cover the latest React Native version and best practices so you can develop with confidence.

## What You'll Build

When you buy Fullstack React Native, you're not buying just a book, but dozens of code examples. Every chapter in the book comes with a complete project that uses the concepts in the chapter and provides support for both iOS (including iPhone X screens) & Android.

- A Weather App - Get your feet wet with React Native by building a weather app allows the user to input their location and grabs weather data from a third party API.
- A Time Tracker - Brush up on your core React knowledge and build a time tracking app.
- A Messaging App - Understand how to use the core React Native APIs like Geolocation, CameraRoll, Keyboard, NetInfo and much more through completing a messaging app
- An Instagram Clone - Learn how to style your app, manage user input, add comments and display photos from Unsplash

## **What You'll Build**

When you buy Fullstack React Native, you're not buying just a book, but dozens of code examples. Every chapter in the book comes with a complete project that uses the concepts in the chapter and provides support for both iOS (including iPhone X screens) & Android.

- A Weather App - Get your feet wet with React Native by building a weather app allows the user to input their location and grabs weather data from a third party API.
- A Time Tracker - Brush up on your core React knowledge and build a time tracking app.
- A Messaging App - Understand how to use the core React Native APIs like Geolocation, CameraRoll, Keyboard, NetInfo and much more through completing a messaging app

- An Instagram Clone - Learn how to style your app, manage user input, add comments and display photos from Unsplash

## FAQ

### How long is the book?

The book has 11 chapters totaling 515 pages, several sample apps totaling over 1000+ lines of code (JavaScript/JSX, non-comment lines).

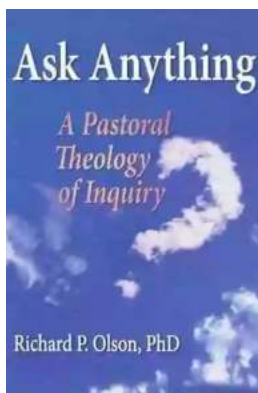

### Do I have to know React?

Nope! We've written the book so that it can be used even if you aren't familiar with React. Although, if you'd like to learn React in depth, checkout our other book Fullstack React

### Do I have to know JavaScript?

Yes, we assume you know the basics of the language. But you don't need to be completely up-to-date: we teach the latest language features in case you're not familiar with them.

However, this book teaches React Native from the ground up and you can use it even if you've never written a mobile app before.
