What can happen in just a second,
a minute, or an hour? How can we measure time?

The flap of a vulture's wing.

A crocodile's heartbeat.

The weight of a baby blue whale.

The life of a mayfly.

These increments of time may sound a bit strange, but they are all fascinating ways in which we can think about time.

But what exactly is time? In *Just a Second*, the award-winning author-illustrator Steve Jenkins brings forth unique ways to think about time beyond the hands we see every day on a ticking clock. This non-fiction picture book explores time and how we think about it in a different way—as a series of events in the natural world (some of them directly observable, others not) that take place in a given unit of time. Steve Jenkins' extraordinary illustrations will accompany this engaging look at time.
