Have you ever wondered what it would be like to truly immerse yourself in a different culture, to observe and understand the nuances of everyday life in a foreign community? Ethnography In The Raw offers a unique perspective on cultural exploration, delving deep into the heart of communities to uncover the truths that lie beneath the surface.

Ethnography is the systematic study of people and cultures. It involves observing and interacting with individuals, groups, or communities to gain a comprehensive understanding of their customs, beliefs, and social structures. Ethnographers aim to go beyond surface-level observations and instead focus on capturing the essence of a culture, making it a valuable tool for researchers, anthropologists, and sociologists.

## Uncovering the Raw Truth

Ethnography In The Raw takes this concept one step further, choosing to explore cultures from an authentic and unfiltered perspective. Instead of portraying a culture through a polished lens, this approach embraces the raw and unrefined aspects of daily life. By doing so, it aims to convey the complexities and contradictions that characterize human existence and challenge common stereotypes.

Ethnography in the Raw describes the author's encounters with the Philippine family into which he has married, his wife's friends and acquaintances, and their lives in a remote rural village in the rice basin of Luzon, about 130 miles northeast of Manila. The book links detailed descriptions of his Philippine family with cultural practices such as circumcision, marriage and cockfights combined with theoretical musings on the concepts of sacrifice, social exchange, patron-client relations, food, and religious symbolism. It is both anthropological fieldwork 'in the raw,' and an incisive analysis of contemporary Philippine society and culture.
