Park Chung Hee's Vision and Strategies

During his presidency from 1961 to 1979, Park Chung Hee implemented various policies and strategies that propelled Korea's growth. His vision centered on achieving rapid industrialization and export-led development. The government provided strong support to key industries, investing in infrastructure, and creating an enabling environment for businesses.

Park's government prioritized education and technology, recognizing their significance in the nation's progress. Universities, research institutions, and vocational training centers were established to equip the workforce with the necessary skills for industrial growth. Incentives were introduced to attract foreign direct investment and bolster export-oriented industries.

The establishment of state-led conglomerates called chaebols, including Samsung and Hyundai, played a crucial role in Korea's economic ascent. These mega-corporations were strategically nurtured with access to credit, tax

incentives, and protectionism to compete globally. They became the driving force behind Korea's industrial growth and exports.

Based on personal interviews with the principal policy-makers of the 1970s, Korea's Development under Park Chung-Hee examines how the president sought to develop South Korea into an independent, autonomous sovereign state both economically and militarily. Kim provides a new narrative in the complex task of exploring the paradoxical nature and effects of Korea's rapid development which maintains that any judgement of Park must consider his achievements in the socio-economic, cultural and political context in which they took place. Aspects of Park's government analyzed include:

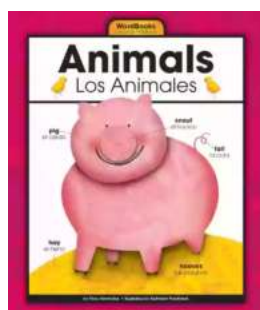

- *his abhorrence of Korea's reliance on the US presence
- *the Korean model of state-guided industrialization
- *Park's rapid development strategy
- *the role of the ruling elites
- *Park's clandestine nuclear development program
- *the heavy chemical industrialisation of the 1970s

The prevailing popularity of Park in the eyes of the Korean public is significant and relevant to their acceptance of how their national development was achieved. This book tells that story while simultaneously recognizing the flaws in the process. With a great deal of material never before published, scholars of Korean politics and history at all levels will find this book a stimulating account of South Korea in the 1960s and 1970s.
