What events lie in the future for Mao Tse-tung and Lyndon B. Johnson?

Will there be a nuclear catastrophe?

What will cancer research reveal?

These are some of the vital questions that prophets and seers in our own times have found answers to—answers the author has recorded here.

Prophets and seers throughout human history have made predictions which have proved to be amazingly accurate. Mediums and mystics have delved into the future and seemed to foretell events. Is it also possible that the ordinary individual can have valid insights into the future—through dreams, "visions," or sudden, unexplained presentiments?

Parapsychologist Hans Holzer, famous as an authority on psychic phenomena, explores the evidence that exists for the truth of prophecy, cites examples of predictions that have come strikingly true, and of others whose proof still lies in the future. Beyond this, Mr. Holzer presents personally documented instances of remarkable glimpses into the future that have come unsought to men and women—glimpses that may force man to re-examine his concepts of past, present and future.
