To sustain and deserve the title of “Gastronomic Regenerator,” nothing but an entire change from the system of any other publication on the art of Cookery would be admissible, it is now in the hands of my readers to judge for themselves, and to stamp its character according to its merits, either as an original or a copy; to avoid the last, however, I have closely studied to introduce the greatest novelty in every department, and have entirely omitted all unnecessary confusion, which, in many previous works, have rendered them unintelligible to the uninitiated, and almost impracticable to the initiated; however, many old and useful receipts, too good to be omitted, will be found much simplified—to reduce them to a practical point.

I have also minutely studied the disposing and arranging of the building of all sized kitchens, from the one of the Reform Club and the Kitchen of the Wealthy to the humble one of the cottage, which cannot fail to prove useful when closely followed, as six years of experience in the kitchen of the Reform Club has fully proved to me that those useful departments have not only previously been much neglected, but in many instances at a very great expense still worse arranged for want of practical knowledge, and considering that the pleasures of the table are an every-day enjoyment which reflects good and evil on all classes, my readers I am sure will agree with me that the proper disposing of such an important department deserves some little attention, for food uncomfortably prepared is almost always unsightly, unwholesome, and consequently indigestible, not being cleanly prepared.
