The African Princess is a dance drama based on the effect of Western influence on the continent. Set on the backdrop of the great African civilization, the play undulates rhythmically through a series of dance movements to re-enact the African experience during pre and post-colonial times. The prized jewel of Africa, the Princess, is taken at gunpoint and forced into accepting the way of life of her captor. No one can save her from this exploitation unless she adapts and changes her destiny. The future of the generations yet unborn lies heavily on her tender shoulder.
