The Ancient Civilizations That Once Thrived on American Soil

Contrary to popular belief, America's history is far more ancient than the arrival of Christopher Columbus in 1492. Thousands of years before Columbus set foot on these shores, advanced civilizations rose and fell across the continent. From the prosperous Mayan civilization to the majestic Inca Empire, ancient America was a melting pot of cultures, each with its own unique customs, architecture, and political systems. These sophisticated societies left behind magnificent ruins and traces of their existence, but not all stories had a happy ending.

The Mysterious Disappearances: Into the Unknown

One of the most perplexing aspects of ancient America is the inexplicable vanishing of entire colonies. Historical records suggest that some groups who ventured into uncharted territories simply disappeared without a trace. The Roanoke Colony, also known as the "Lost Colony," is among the most well-known examples. In 1587, a group of English settlers established Roanoke Island as the first permanent English colony in North America. However, when a relief team arrived three years later, they found the settlement deserted, with only the word "Croatoan" carved into a nearby tree. To this day, the fate of those colonists remains a mystery.

Another enigmatic disappearance was that of the Anasazi civilization. Flourishing in the southwest of what is now the United States, the Anasazi built intricate cliff dwellings and lived in harmony with the land for centuries. However, around the

13th century, the Anasazi mysteriously abandoned their homes, leaving behind a rich cultural heritage and perplexed archaeologists who still struggle to understand their sudden departure.

Was America truly unknown to the outside world until Christopher Columbus "discovered" it in 1492? Could a people gifted enough to raise the Great Pyramid more than 4,000 years ago have lacked the skills necessary to build a ship

capable of crossing the Atlantic? Did the Phoenicians, who circumnavigated the African continent in 600 bc, never consider sailing farther? Were the Vikings, the most fearless warriors and seafarers of all time, terrified at the prospect of a transoceanic voyage?

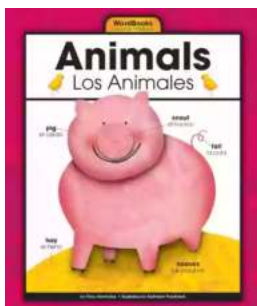

If so, how are we to account for an Egyptian temple accidentally unearthed by Tennessee Valley Authority workers in 1935? What is a beautifully crafted metal plate with the image of a Phoenician woman doing in the Utah desert? And who can explain the discovery of Viking houses and wharves excavated outside of Boston?

These enigmas are but a tiny fraction of the abundant physical proof for Old World visitors to our continent hundreds and thousands of years ago. In addition, Sumerians, Minoans, Romans, Celts, ancient Hebrews, Indonesians, Africans, Chinese, Japanese, Welsh, Irish, and the Knights Templar all made their indelible, if neglected, mark on our land.
