

The Twenty Year Revolution From Roosevelt To Eisenhower: A Journey of Transformation

From the Great Depression to World War II and the post-war economic boom, the period from Franklin D. Roosevelt's presidency to Dwight D. Eisenhower's marked a transformative era in American history. It was a time of immense change, progress, and challenges. The choices made by these two remarkable leaders shaped the nation and set it on a path towards modernization, prosperity, and global influence.

Roosevelt's Bold Vision: Lifting the Nation from Despair

When Franklin D. Roosevelt assumed office in 1933, the United States was grappling with the devastating effects of the Great Depression. The economy was in shambles, unemployment was at an all-time high, and hope seemed to be diminishing. However, Roosevelt's New Deal policies, which focused on government intervention and social welfare programs, breathed new life into the nation.

Roosevelt embarked on an ambitious mission to stimulate economic growth and improve the lives of ordinary Americans. Through programs such as the Civilian Conservation Corps, the Tennessee Valley Authority, and the Social Security Act, he provided jobs, infrastructure, and a safety net for those in need. This marked a significant departure from the laissez-faire policies of the previous era.

His efforts to unite the country and mobilize its resources for war resulted in a transformed America, both in terms of its global standing and its domestic policies.

Eisenhower's Pragmatic Approach: Consolidating and Expanding

As World War II came to an end, the United States faced the challenge of transitioning from a wartime economy to a peacetime society. It was during this crucial period that Dwight D. Eisenhower became the 34th President of the United States.

Eisenhower's pragmatic approach focused on consolidating the gains made during Roosevelt's presidency and expanding America's influence on the world stage. He prioritized infrastructure development, facilitating the construction of the Interstate Highway System, which revolutionized transportation and fueled economic growth.

Eisenhower also recognized the importance of scientific progress and innovation. He supported the establishment of NASA and the development of the National Defense Education Act, which aimed to improve science and mathematics

education in the country. These initiatives played a crucial role in shaping the future of American technological advancement and space exploration.

Additionally, Eisenhower's emphasis on diplomacy and negotiations led to the signing of several significant agreements, including the Korean Armistice Agreement and the creation of NATO. His commitment to international cooperation and peaceful resolutions set the stage for the United States' global leadership role in the years to come.

The Cultural Revolution: Social Change and Civil Rights

Beyond the political and economic transformations, the twenty-year period from Roosevelt to Eisenhower witnessed a cultural revolution as well. Society underwent profound changes in attitudes and beliefs, challenged by movements advocating for civil rights, women's rights, and increased social equality.

Roosevelt's New Deal addressed some of the hardships faced by marginalized communities, such as African Americans, but it was during the post-war years that significant strides were made in the struggle for civil rights. The Supreme Court's landmark decision in *Brown v. Board of Education* in 1954 marked a turning point in the fight against racial segregation in schools.

While there was still a long way to go, Eisenhower's presidency saw notable advancements in the civil rights movement. He implemented desegregation in the armed forces and publicly supported the Supreme Court's decision to end segregated schools. The civil rights pioneers of this era, including Rosa Parks and Martin Luther King Jr., played a vital role in shaping the future of equal rights in America.

The Legacy of the Twenty Year Revolution

In The Twenty-Year Revolution from Roosevelt to Eisenhower, which was first published in 1954, author Chesly Manly, the United Nations Correspondent of the

Chicago Tribune, leaves practically no part of government operation untouched. He covers the advent of the New Deal; the first year of the Eisenhower administration, with revelations of “diplomatic relations with an implacable enemy; subversion of national policies by collectivist legal and economic ‘experts’; willful toleration of communist infiltration into the government; active encouragement of such infiltration into the labor unions”, and wilful toleration of communist infiltration into the government to active encouragement of such infiltration into the labor unions and “reliance upon the Communists for political support”.
