This book examines the lives and times of Japan's postwar prime ministers, covering the period from 1945 to 1995. Written by Japan's leading scholars, it is the first English-language biographical portrait of these twenty-three individuals who helped lead Japan on its road to recovery, its return to the community of nations, and its subsequent prosperity. Each chapter brings out, to varying degrees, the larger political and historical environment, party dynamics, and personality traits of the prime ministers. In addition, the book discusses not only the policy choices the prime ministers made, but how those decisions were made and what the consequences were for the country, ruling party, and the individual who made them. *The Prime Ministers of Postwar Japan, 1945–1995* fills a large void in the literature on postwar Japan by introducing the actual people who made the decisions during these important years, rather than simply discussing the theories and institutions in which those decisions were made.
