

Treason At The Air Force Space Command

The Air Force Space Command (AFSPC) has long been hailed as a crucial component of America's national defense. Charged with the responsibility of protecting U.S. interests in space, safeguarding communication systems, and providing satellite-based capabilities for both military and civilian use, the AFSPC is at the forefront of technological advancements and national security.

However, recent events have shaken the foundations of this prestigious command. Allegations of high-level treason within the AFSPC have emerged, casting a dark cloud over the once-trusted institution. This article aims to delve into the details of this shocking betrayal and shed light on the potential consequences for national security and public trust.

The Accusations

The accusations of treason at the AFSPC are centered around high-ranking officials who have allegedly compromised sensitive information and leaked classified data to foreign adversaries. These allegations, if proven true, paint a disturbing picture of betrayal and espionage within the ranks of the U.S. Air Force.

Investigators have identified several individuals, some of whom held influential positions within the command, as potential suspects. The leaked information reportedly includes details about satellite capabilities, strategic military operations, and vital communication systems that could severely compromise America's national security.

The Impact on National Security

The potential consequences of this alleged treason are far-reaching and worrisome. Space-based systems play a vital role in modern warfare, intelligence gathering, and global communication. The compromise of such systems could leave the United States vulnerable to attacks, disrupt crucial military operations, and jeopardize the security of sensitive information.

There is also a growing concern about the implications for international relations. If the allegations are proven, it would likely strain diplomatic ties between the U.S. and the implicated countries. The loss of trust and damage to reputation could have severe consequences for future collaborations and alliances.

The Investigation

The investigation into the alleged treason at the AFSPC is ongoing, spearheaded by a joint task force comprising experts from the U.S. Air Force, Intelligence community, and federal law enforcement agencies. The complexity and sensitivity of the case require extensive resources and expertise to ensure a fair and thorough examination of the evidence.

A key aspect of the investigation involves tracing the communication channels used to leak classified information. Technical experts are working tirelessly to identify potential weaknesses in the command's security infrastructure, as well as any digital footprints left behind by the perpetrators. The collaboration between cybercrime specialists and intelligence analysts is crucial in piecing together the chain of events and identifying those responsible.

The Consequences

If the allegations are proven, the consequences for those involved will be severe. Treason is considered one of the gravest offenses against a nation, carrying significant punishments, which may include life imprisonment or even the death penalty. Beyond the personal consequences, the reputation and integrity of the AFSPC will be tarnished, leading to a loss of public trust and increased scrutiny of the command's security protocols.

The aftermath of such a betrayal may also necessitate a revision of security practices and protocols within the AFSPC. A thorough review of the command's operations, including its recruitment and vetting processes, will be crucial in preventing similar incidents in the future. Close cooperation with the Intelligence community and increased oversight of personnel will also be imperative in safeguarding national security.

Treason allegations within the Air Force Space Command have sent shockwaves through the defense and intelligence communities. The potential compromise of sensitive information and the implications for national security cannot be understated. As the investigations into these accusations continue, it is crucial that justice is served, and steps are taken to reinforce the trust and security of the AFSPC. Safeguarding the nation's interests in space should always remain paramount.

Rev 1D - This short ebook provides the author's opinions and accuses 12 military officers of High Treason against the United States (The Dirty Dozen). The Air Force Space Command, headquartered in Colorado Springs, Colorado, is the primary organization that is using microwave satellite technology to track and attack civilians all around the world. These civilians are known as Targeted Individuals. Many of these civilians are political activists and whistleblowers – people that the Deep State would like to silence. Their family relationships have been destroyed through the use of subliminal messaging. Their careers, and finances can be ruined. It is a conspiracy of enormous magnitude, affecting 170 thousand TI's, by the latest estimates.

The original satellites for this illegal program were launched in the late 1980's, as part of President Reagan's Star Wars program or Strategic Defense Initiative (SDI). The satellites were designed to track and attack ballistic missiles. Unfortunately, the Deep State decided to put these satellites to purposes that violate international treaties and the U.S. Constitution. Do not underestimate that these actions constitute Treason against the United States and its sovereign

citizens, and this is the reason that the CIA and Air Force will go to great lengths to hide this program. The Council on Foreign Relations (CFR) is the source of this corruption, in my opinion, where David Rockefeller was the CEO and Chairman for many years.

General John W. Raymond is the current commander of this criminal enterprise.

The executive officers at Peterson Air Force Base and Schriever Air Force Base are listed below.

Each one of these officers swore an oath of allegiance to “support and defend the Constitution of the United States against all enemies, foreign and domestic.”

The following accusation is an opinion of this author:

For aiding, abetting, or directing the use of microwave military weapons against U.S. citizens, these military officers are guilty of High Treason against the United States:

The Dirty Dozen:

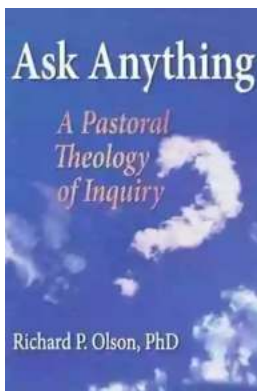

1. General David. L. Goldfein, Air Force Chief of Staff
2. Dr. Heather A. Wilson, Secretary of the Air Force
3. General John W. Raymond
4. Major General Stephen N. Whiting
5. Major General Robert J. Skinner
6. Mr. Scott M. Anderson
7. Colonel Todd R. Moore
8. Colonel Eric S. Dorminey
9. Colonel John L. Doucet III

10. Colonel Jennifer L. Grant
11. Colonel Jacob E. Middleton
12. Colonel Devin R. Pepper

My accusation is backed by the statements of 20 medical doctors, scientists, and former intelligence agents, that have stated these crimes are real and happening globally (see TargetedJustice.com & BiggerThanSnowden.com). More than 1 million people are targeted worldwide using these satellites under the command and control of the United States Air Force.

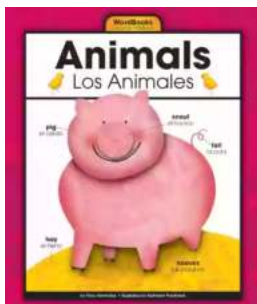

It is difficult to believe these officers are unaware of the Treason and War Crimes that are occurring under their command, or that they are not involved. There are far too many logistical, support, and authorization issues for it to be hidden from the officers.

The home address for these military officers is provided.
