=====□ DESCRIPTION□=====

The main objective of the books belonging to the "Visual Chinese Vocabulary" series is to make it easier for the reader to learn a set of Chinese words related to a particular topic, allowing immediate association between the written term and the image it represents.

The secondary objective of the series is to facilitate the identification of the characters that make up each word in several calligraphic styles; since in daily

life, it is not always possible to find the terms in the form they are written in textbooks.

So, for each of the books in the series, a careful selection of the words that compose them has been made, according to the topic. In the same way, special care has been taken in the selection of each of the images and the font used, both in Chinese and Western writing.

Therefore, from the series "Visual Chinese Vocabulary", there is nothing more to say else than the wish to every one of you:

Happy learning!
