This pamphlet is an appeal to reason and common sense.

It is not written specially for scientific experts and hence technical terms have been as far as possible avoided. The student or scientist who desires a more detailed and technical treatment of these problems is referred to larger treatises, of which there are a considerable number.

Our purpose is to reach intelligent and thoughtful men and women. We propose to examine the theory of evolution in the light of scientific facts. We ask for an open mind, a careful consideration of the evidence on both sides, and an honest verdict.
