The Power of Long Descriptive Numbers in Mimi Languages

Did you know that German, like many other languages, has its own unique way of forming numbers? Unlike English, German numbers can be quite descriptive and long. Let's take a look at an example:

The number 175 in German is composed of three parts:

1. 1 - ein()
2. 75 - fünfundsiebzig

The number 75, or "fünfundsiebzig" in German, directly translates to "five and seventy." This structure might seem puzzling at first, but once you grasp the logic behind it, these descriptive numbers will become second nature.

The advantage of descriptive numbers is that they allow for precise descriptions in a more concise manner. For example, imagine someone telling you that they are "einundsiebzig" (71 years old) instead of simply saying "sechzig und elf" (60 and 11). By using descriptive numbers, you can communicate complex numerical information more efficiently.
