

What's the Worst That Could Happen?

Descriptor	Negligible (WHITE)	Minor (GREEN)	Medium (YELLOW)	Major (AMBER)	Extreme (RED)
Impact on Individual	Minimal problems with HAI	Short term problem < 1 month e.g. delayed discharge, short term treatment	Injury/treatment up to 1 year e.g. re-admission, further surgery, prolonged IV treatment, Delayed non-urgent procedure due to HAI	Permanent injury ITU admission Delayed urgent procedure(s)	Death due to HAI
Impact on Service	Minimal impact due to HAI	Ward(s) under enhanced surveillance, not restricted or closed, minimal need for agency staff	Ward(s) closed/restricted, inappropriate boarding of patients but no cancellation of services, increased need for agency staff	Ward(s) closed or restricted causing cancellation of elective cases / procedures, Staff shortages due to sickness	Ward(s) closed / restricted leading to cancellation / transfer of emergency cases to other hospitals / Closure of hospital
Impact on organisation	Minimal	Some internal public relations	Needs local public relations / Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) report	Major public relations exercise beyond local area	External investigation e.g. TAI
Non-compliance - Infection Control standards/advice	Minimal	Minimal exposure to infection risk due to non-compliance with Infection Control Policy / advice	Possible exposure to infection risk due to non-compliance with IC Policy / advice	Deliberate exposure to infection risk due to non-compliance with Infection Control Policy / advice, e.g. MRSA, VRE, Norovirus	Exposure to serious infection risk due to non-compliance with IC Policy / advice, e.g. SARS, HIV, TB
Surveillance data (national level)	Minimal rise in infections	<1SD-2SD rise compared with average	~2SD rise in infections compared with average	>2SD rise in infections compared with average	Single case of 'major alert' organism or very large outbreak
Public Health implications	Minimal	Cross infection with minimal public health impact	Outbreaks, cross infection affecting hospital service, 1-25 cases e.g. Norovirus, MRSA, VRE	Outbreaks, cross infection with public health considerations 1-60 cases depending on organism e.g. 1-2 Salmonella 20-60 Norovirus	Major public health considerations 1-60 cases depending on organism e.g. one SARS, HIV, MDR TB >60 Norovirus

*SD = standard deviation

We all have moments in life where we hesitate to take risks due to the fear of potential negative outcomes. But have you ever stopped to consider what the worst that could happen actually is? In this article, we will dive deep into various scenarios and explore the potential consequences.

1. Embarking on New Ventures

Imagine you have an exciting business idea that you've been contemplating for years. However, the fear of failure is holding you back from taking action. You ask yourself, "What's the worst that could happen if I start my own business?" It's time to explore this question.

What's the Worst That Could Happen?: A Rational Response to the Climate Change Debate

The answer may include financial loss, damaged reputation, and stress. But on the flip side, consider the possibility of success, growth, and personal fulfillment. By embracing the notion of risks, you open yourself up to a world of potential rewards.

2. Pursuing Your Dreams

We often abandon our dreams due to fear of failure or societal pressure. But what if we muster the courage to pursue those passions? What's the worst that could happen if you follow your heart?

While setbacks and disappointments may be part of the journey, the true failure lies in not trying at all. Embracing your dreams can lead to personal growth, self-discovery, and a life lived with purpose and fulfillment.

3. Taking Relationship Risks

Love and relationships can be complex and unpredictable. It's no wonder we fear the worst when it comes to matters of the heart. But what if we take the risk and open ourselves up to love?

The worst that could happen might include heartbreak, betrayal, or rejection. However, the potential rewards may outweigh the potential risks. By being vulnerable, we create the opportunity for deep connections, lifelong companionship, and shared happiness.

4. Stepping Out of Your Comfort Zone

Our comfort zone is a safe and familiar place. But what if we dare to step outside of it and explore the unknown? What's the worst that could happen if you challenge yourself?

While it may feel uncomfortable and nerve-wracking, stepping out of your comfort zone can lead to personal growth, expanded horizons, and new experiences. Embracing discomfort can help you overcome fears, build resilience, and foster self-confidence.

5. Facing Failure

In many aspects of life, failure is viewed as a negative outcome. However, what's the worst that could happen if we fail?

Failure often provides valuable lessons and insights. It can push us to reassess our strategies, improve our skills, and develop resilience. By reframing failure as a learning opportunity, we can grow and evolve towards success.

While taking risks can be intimidating, it's important to consider the potential consequences from a different perspective. Instead of dwelling on the worst that could happen, explore the possibilities for growth, personal development, and achievement.

Remember, inaction often leads to regret, while taking risks can lead to a life lived to its fullest. Embrace the unknown, challenge yourself, and let go of the fear of

failure. Who knows, the worst that could happen might just turn into the best thing that ever happened to you.

7.2 million YouTube viewers can't be wrong: A provocative new way to look at the global warming debate.

Based on a series of viral videos that have garnered more than 7.2 million views, this visually appealing book gives readers-be they global warming activists, soccer moms, or NASCAR dads-a way to decide on the best course of action, by asking them to consider, "What's the worst that could happen?" And for those who decide that action is needed, Craven provides a solution that is not only powerful but also happens to be stunningly easy. Not just another "change your light bulb" book, this intriguing and provocative guide is the first to help readers make sense-for themselves-of the contradictory statements about global climate change.

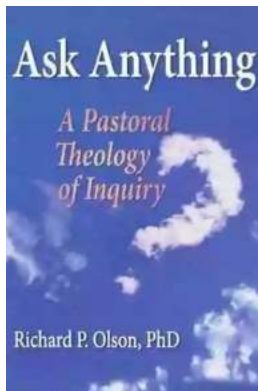

The globe is warming! or The globe is not warming.

We're the ones doing it! or It's a natural cycle.

It's gonna be a catastrophe! or It'll be harmless.

This is the biggest threat to humankind! or This is the biggest hoax in history.
