

Why We Must How We Can

The Urgency of Action

As our world faces numerous challenges, it is imperative that we understand the significance of taking action to address these issues. The consequences of inaction can be severe and irreversible, but if we act now, we can make a positive impact on the future of our planet.

Environmental Threats

One of the most pressing issues we face today is the threat to our environment. Climate change, deforestation, pollution, and loss of biodiversity are just a few examples of the detrimental effects of human activities. These problems not only pose a risk to the natural world but also have a direct impact on human health, food security, and socioeconomic stability.

The Role of Individuals

While the magnitude of these challenges may seem overwhelming, it is important to recognize that every individual has the power to make a difference. By adopting sustainable practices in our daily lives, such as reducing waste, conserving energy, and supporting eco-friendly businesses, we can contribute to the collective effort of mitigating these threats.

Government and Policy Changes

In addition to individual actions, it is crucial for governments and policymakers to implement effective measures to combat environmental issues. This can include

enacting stricter regulations on carbon emissions, investing in renewable energy sources, and promoting sustainable agriculture practices. By prioritizing environmental conservation, governments can set an example for their citizens and encourage a culture of environmental awareness and responsibility.

Innovation and Technology

Advancements in technology and innovation also play a vital role in addressing environmental challenges. From renewable energy technologies to sustainable waste management systems, innovative solutions are being developed to minimize our ecological footprint. Embracing these technological advancements and supporting research and development in environmental sciences can pave the way to a more sustainable and resilient future.

Educating the Next Generation

Ensuring a sustainable future requires educating the younger generations about the importance of environmental stewardship. By integrating environmental education into school curricula and fostering a sense of connection with nature, we can empower young minds to value and protect our planet. Through education, we can inspire future leaders, innovators, and changemakers who will continue to work towards a sustainable and just world.

Taking Action Now

While the challenges we face may seem daunting, it is crucial that we do not succumb to inaction or despair. We must recognize the urgency of the situation and take concrete steps towards a sustainable future. By working together, mobilizing resources, and advocating for change, we can create a world where future generations can thrive.

The Time for Change is Now

, the current state of our environment demands immediate action. The consequences of our inaction will be felt for generations to come. However, by understanding the urgency of the situation, adopting sustainable practices, advocating for policy changes, embracing innovation, and educating future generations, we can pave the way for a brighter and greener future. Remember, the time for change is now.

An urgent and definitive collection of essays from leaders and experts championing the Green New Deal—and a detailed playbook for how we can win it—including contributions by leading activists and progressive writers like Varshini Prakash, Rhiana Gunn-Wright, Bill McKibben, Rev William Barber II, and more.

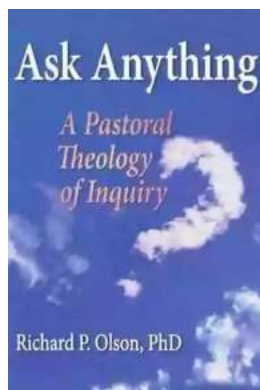

In October 2018, scientists warned that we have less than 12 years left to transform our economy away from fossil fuels, or face catastrophic climate change. At that moment, there was no plan in the US to decarbonize our economy that fast. Less than two years later, every major Democratic presidential candidate has embraced the vision of the Green New Deal—a rapid, vast transformation of our economy to avert climate catastrophe while securing economic and racial justice for all.

What happened? A new generation of leaders confronted the political establishment in Washington DC with a simple message: the climate crisis is here, and the Green New Deal is our last, best hope for a livable future. Now comes the hard part: turning that vision into the law of the land.

In *Winning a Green New Deal*, leading youth activists, journalists, and policymakers explain why we need a transformative agenda to avert climate

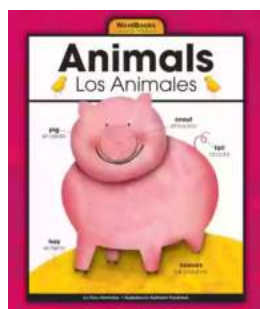

catastrophe, and how our movement can organize to win. Featuring essays by Varshini Prakash, cofounder of Sunrise Movement; Rhiana Gunn-Wright, Green New Deal policy architect; Joseph Stiglitz, Nobel Prize–winning economist; Bill McKibben, internationally renowned environmentalist; Mary Kay Henry, the President of the Service Employees International Union, and others we'll learn why the climate crisis cannot be solved unless we also confront inequality and racism, how movements can redefine what's politically possible and overcome the opposition of fossil fuel billionaires, and how a Green New Deal will build a just and thriving economy for all of us.

For anyone looking to understand the movement for a Green New Deal, and join the fight for a livable future, there is no resource as clear and practical as *Winning the Green New Deal*.
